

PHAM MINH TAM

Frontend Developer | ReactJS · NextJS · TypeScript

Ho Chi Minh City | 0336 440 678 | ph.minhtam.0611@gmail.com | github.com/minhtam-mintum

SUMMARY

Frontend Developer with 4 years of experience building scalable web applications in enterprise outsourcing environments using ReactJS, NextJS, and TypeScript. Focused on frontend architecture, reusable component systems, and performance optimization at scale.

TECHNICAL SKILLS

Core Technologies: JavaScript, TypeScript, ReactJS, NextJS

State & Data Fetching: Tanstack Query, Redux, Redux Saga, Redux Toolkit

Architecture & Performance: Scalable frontend architecture, component design systems, large-dataset rendering optimization, code splitting & lazy loading, SSR / SSG / hydration

UI & Tooling: TailwindCSS, MUI, Kendo UI, REST API integration, Git, Agile / Scrum

PROFESSIONAL EXPERIENCE

South Telecom

Frontend Developer

Ho Chi Minh City

May 2022 – Mar 2026

Delivered scalable frontend applications for enterprise clients across the Banking, E-commerce, Healthcare, and Energy sectors.

- Improved application performance by ~30% through React rendering optimization, code splitting, and lazy loading.
- Implemented secure JWT authentication with a refresh-token flow across multiple client projects.
- Independently bootstrapped frontend projects from setup to production, collaborating with backend, QA, and PM teams in Agile.

KEY PROJECTS

IVBank Management System

Sole Frontend Developer

Jul 2025 – Mar 2026

Internal financial management platform for account management, billing, top-up operations, and reporting dashboards.

- Owned end-to-end frontend architecture, from project setup to production deployment.
- Designed a modular component architecture and built data-intensive dashboards handling large datasets for financial reporting.
- Implemented efficient data fetching and caching with Tanstack Query; integrated RESTful APIs.

Tech Stack: ReactJS, TypeScript, TailwindCSS, Tanstack Query, React Hook Form

Locstoc E-commerce Platform

Frontend Developer

May 2024 – Oct 2025

Omnichannel retail platform spanning four frontend applications, connecting online product discovery with in-store purchasing.

- Contributed across all four applications — admin portal, brand-partner portal, store management system, and the consumer-facing O2O storefront — with the most extensive work on the store system.
- On the store system, built order management with multiple status-based views and an integrated POS purchase flow.
- Implemented product and inventory management, including the inbound workflow tracking product flow into warehouses.
- Built the O2O storefront in NextJS with SSR, optimizing image-heavy pages and large product datasets for SEO and performance (remaining apps in ReactJS).

Tech Stack: NextJS, ReactJS, TypeScript, Redux Toolkit, Tanstack Query

Enterprise Systems — EVN, Affina Insurance, Giọt Máu Vàng

Frontend Developer

May 2022 – May 2024

Enterprise platforms for electricity billing, insurance policy management, and healthcare campaigns.

- Developed and maintained frontend features and internal dashboards for enterprise-scale applications.
- Implemented UI modules for billing, policy management, and donor systems.
- Integrated RESTful APIs for complex business-logic handling.

Tech Stack: ReactJS, Redux, Redux Saga, MUI, REST API

EDUCATION

Cao Thang Technical College

Information Technology

Ho Chi Minh City

2016 – 2019

CERTIFICATION

Frontend Developer — CyberSoft

2022

ADDITIONAL INFORMATION

Languages: English (Intermediate)

Strengths: Strong ownership mindset; able to work independently and deliver end-to-end features; continuous learning and adoption of modern frontend practices.
